

**Who are we ?**

**Cinécylo** is a nonprofit, cultural organization, located in France, which promotes international solidarity through the organization of adventure travels and **autonomous bicycle screening touring**. The association aims to promote cultural and knowledge exchange through the screening of movies and documentaries. Started in Québec (Canada) in 2013, we are currently active in France, Canada and Senegal.

**What about the project ?**

Cinécylo is on the road again in 2016 ! Right after the Cinécylo Tour of Senegal 2015, the organization is preparing a new project. The Cinécylo Tour Panamericana 2016 is a **cycling trek of 10 months** and about 10 000 km (6 200 mi) across America, from the Province of Québec to La Tierra del Fuego at the southernmost point of the continent.

During this adventure, we will **organize visits, screenings and discussions** with environmental protection organisms, citizens' initiatives, associations, schools and universities about **ecosystem services**, namely the benefits that humans can obtain from Nature. Following the Cinécylo Tour of Senegal, electricity for the screenings will be produced thanks to a **pedal powered generator** installed on our bicycle.

**Events are meant to be fun and promote ideas and knowledge exchange.** We wish to inspire others to take actions towards a more sustainable use and understanding of our environment.

**How can you take part ?**

- Present us your project and your activities
- Help us to set up a screening

**What can we offer you ?**

**The concept**

- Organization of a public event
- Screening of a movie on the topic of your interest
- Debate about the screening and your activities
- Have fun and share ideas!
- Pedal to power the screening!

**The screening type**

- Screening of short movies or a documentary
- Screening of videos selected by yourself
- Presentation of our travel
- Screening of classic movies
- Karaoke

**Examples of topics :** Forest/biodiversity conservation, agroecology and food, renewable energy, water and river conservation, mobility, alternative social and economic models
